

# Graphisoft Registered Consultants Program

The Graphisoft Registered Consultants Program provides a globally unique methodology to help architectural firms migrating from traditional 2D workflows to Building Information Modeling. Graphisoft is recruiting independent consultants to become trained in this methodology, so that they can provide onsite implementation support for these firms.

## ArchiCAD Virtual Building Implementation Methodology

### "Evaluation of Practice"

Analysis of the framework in which the new project will be carried out; will provide information about available resources and requirements for the final results of the project.

### "Human Resources"

The most important "people" requirements for successful projects, including explaining the main roles and responsibilities of the members of the model based design team.

### "Project Setup"

How to structure the ArchiCAD project for best productivity.

### "Project Workflows"

Typical BIM workflow and collaboration methods during the entire lifecycle of a project

### "Project Management"

Strategies for setting up the project folder structure, and backing up/archiving files.

### "Best Practices"

A collection of practical solutions for the typical problems encountered in complex, large-scale projects.

## Training & Testing for Consultant Candidates

Consultant candidates are required to participate in a 2-day event at which they are trained in the implementation methodology. This event concludes with a comprehensive exam: candidates who pass the exam become registered consultants. The test consists of the following parts:

- Multiple Choice Test – candidates answer randomized multiple-choice questions.
- Essay – each candidate is assigned a scenario based on typical situation and must write an essay that offers a solution plan.
- ArchiCAD Assignment – each candidate is assigned a sample ArchiCAD project that has encountered a problem, and must work in the project to solve it.

## Web 2.0 Community for Registered Consultants

Consultants exchange experiences and further develop the implementation know-how through a modern Web 2.0 community website. The <http://implementBIM.com> website also hosts consultants' profiles with their experiences and service offerings.

## Branding of Registered Consultants

Registered Consultants are entitled to use the Graphisoft Registered Consultant logo and the following branded materials:

- Registration Plaque – A personalized registration plaque is provided upon successful acceptance to the program in PDF format
- Business Card Template – A standard business card template with the registered consultant logo is provided to each registered consultant
- Web Banners – Web banners are provided to registered consultants to promote the program and their services on the web

## Application to the Graphisoft Registered Consultants Program

- ArchiCAD Proficiency – Applicants must prove their advanced level command of ArchiCAD by taking the ArchiCAD Competency challenge.
- ArchiCAD License – Applicants must own a full commercial license of the latest version of ArchiCAD. The ArchiCAD license must be in the ArchiCAD maintenance contract scheme.
- Professional Resume – As part of their application, applicants should submit a cover letter along with a professional resume, focusing on their experience with ArchiCAD.
- Registration & Membership Fee – Upon registration and while participating in the program, consultants are obliged to pay a set fee. For payment details, please consult the official ArchiCAD distributor in your country.

## Registration

If you are interested in the Registered Consultant Program please visit: <http://implementBIM.com/application> or contact the Australian Registered Consultants Program Administrator, Penny Andricopoulos, at [rcp@graphisoft.com.au](mailto:rcp@graphisoft.com.au)
