### How to Install ActiveX GDL Web Control/Plug-in

(For Internet Explorer 6 and Safari browsers)

#### Step 1 – Open your Internet Explorer 6 or Safari browser

Open the relevant specified browser with the following link:

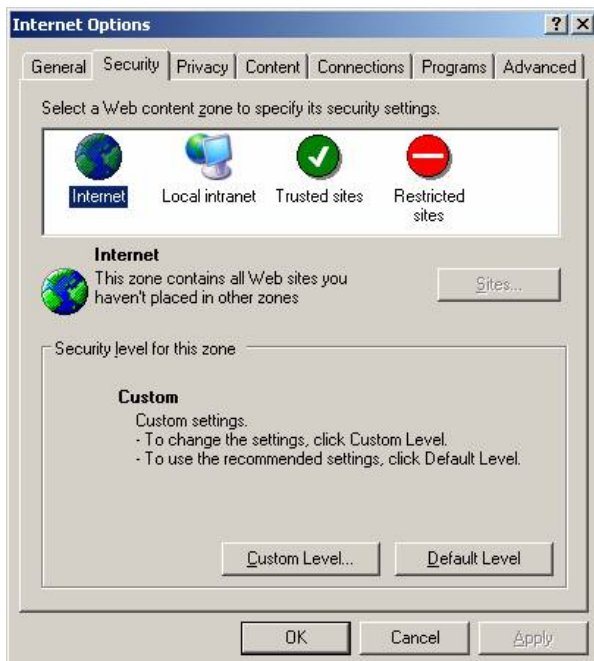

[http://www.graphisoft.com/products/archicad/object\\_technology/downloads/installwebctrl.html](http://www.graphisoft.com/products/archicad/object_technology/downloads/installwebctrl.html).

Installation should start automatically. Follow the onscreen prompts to install the ActiveX Plug-in to your browser. (Internet Explorer users only, continue to Step 2)

#### Step 2 – Check Custom settings in Internet Options

At the menu bar in the browser, go to:

Tools > Internet Options > Security tab > click Custom Level button. (see figure below)
